DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Southworth et al (US 3,842,894).

Southworth et al disclose the method of sensing molten metal height in a feeding launder comprising the steps of electro-optically determining the location of a portion of the launder and the molten metal surface and determining from the launder portion and the metal surface location the height of the metal in the launder (figure 1 and col. 2, lines 47-54).
